

African Milling School

Advanced Level

Head Miller Course 2018

Success with
qualified
staff

African Milling School

Operational milling excellence

Highly skilled head millers will ensure that plants are maintained at high levels leading to plant efficiency and longevity.

Training of experienced millers

The goal of the training is to enable head millers to manage a milling plant with the best yield, highest quality of flour and optimized cost effectiveness.

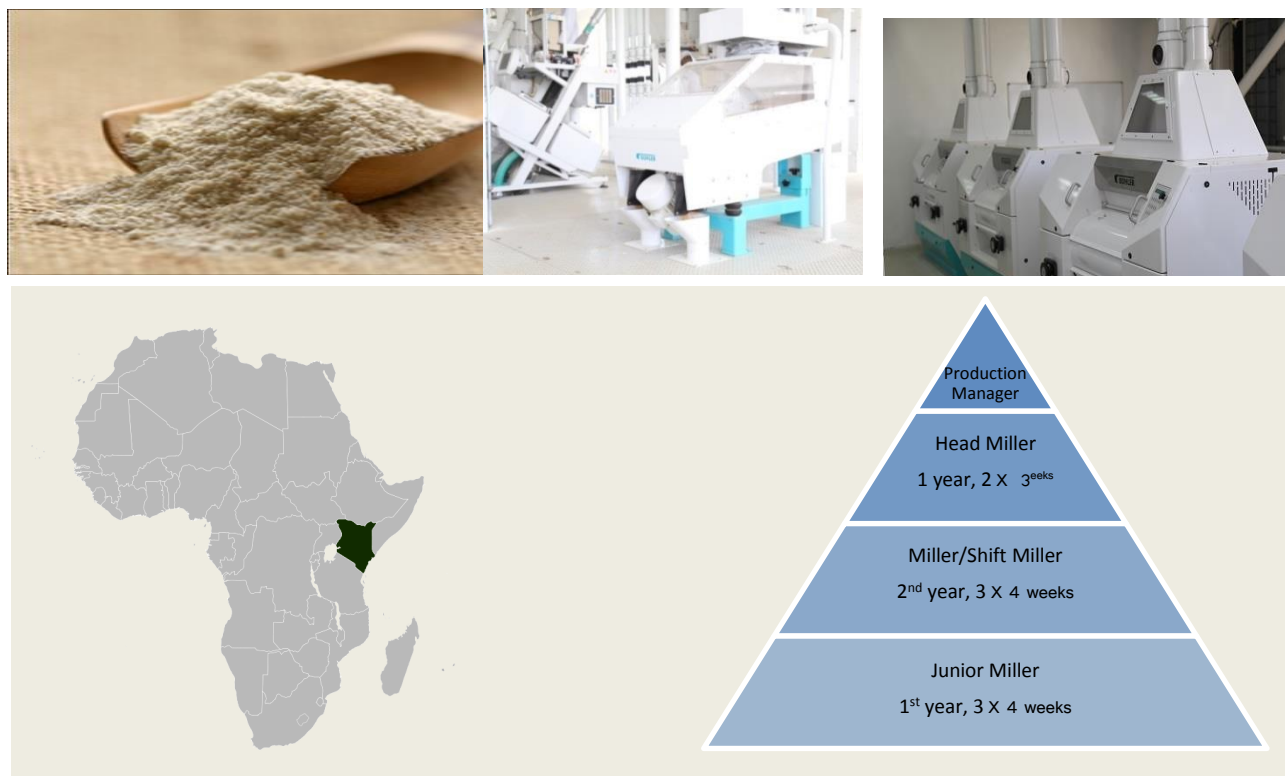

Head Miller Course

The advanced level for Head Millers is a combination of lectures and hands-on training in a professional manner. The state of the art school mill allows practical training on wheat and maize milling. There is a fully equipped laboratory that will allow the participants to learn all about quality control from grain to flour.

Key benefits of Head Miller Course

- Understanding the technology from grain to flour
- Optimal setting of equipment
- High flour yield and quality
- Application of QC methods
- High plant efficiency

African Milling School – ‘Skill is the base for operational milling excellence’.

Located in Nairobi, Kenya

Nairobi is a central business hub for East Africa and is the ideal location for the AMS, situated just 25 minutes from Nairobi's international airport.

Training offerings

The educational program for the Advanced Level for Head Millers is built upon 2 modules.

Each module consists of 3 weeks which the participants will need to attend the school. The educational modules at the AMS for the Head Miller course 2018 are scheduled as follows;

Module 1: 8th- 26th January, 2018

Module 2: 9th – 27th April, 2018
