

# African Milling School.

Success with  
qualified staff.

**African Milling School**

## **Sustainable success with qualified staff**

The African Milling School (AMS) offers comprehensive and intensive training in the milling industry with a focus on theoretical and practical training. Highly skilled millers will ensure that plants are maintained at high levels leading to plant efficiency and longevity.

## **Training of young and experienced millers**

The target is to offer professional training for the next

generation of millers and to expand on the knowledge base of experienced millers. The aim is to ensure millers come to understand the technology and equipment used to process grain into high value finished products.

## **Training offerings**

### **Apprenticeship program**

A two years dual milling credential program with practical work and theoretical schooling.

### **Advanced training**

Expand the knowledge base of experienced millers.

### **Expert courses**

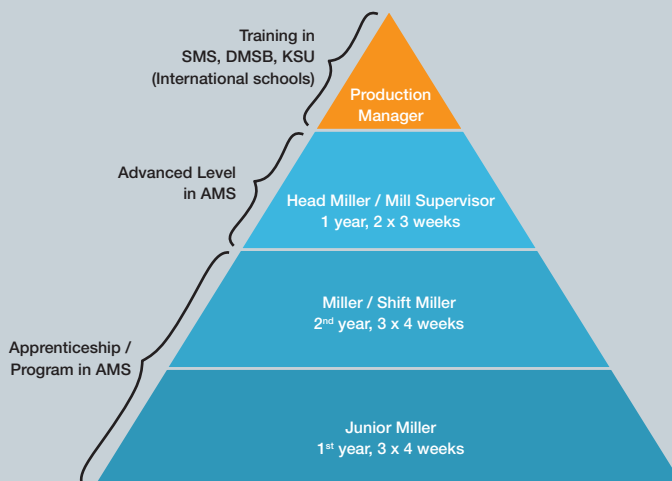

Short courses in milling, maintenance and quality control.

## **Key benefits of African Milling School**

- Training of operational milling staff
- Sharing of milling knowledge and standards
- Qualified staff to assure operational excellence
- High plant efficiency

# African Milling School – skill is the base for operational milling excellence.

## Located in Nairobi, Kenya

Nairobi is a central business hub for East Africa and is the ideal location for the AMS, situated just 25 minutes from Nairobi's international airport.

## Training for all skill levels

African Milling School (AMS) for Junior, Advanced and Head Millers / Mill Supervisors. Swiss Milling School (SMS), Deutsche Müllerschule Braunschweig (DMSB) and Kansas State University (KSU) for higher education degree.

## Additional information

Student capacity	up to 24 participants in Apprenticeship program and advanced training up to 12 participants in Expert courses
Language of courses	English
Facilities	two classrooms, laboratory, functional training mill
Training facilities	grain cleaning with color sorting combined wheat and maize milling finished product handling with bran pelleting plant
