

African Milling School

Feed Milling Technology

High Value Compound Feed!

A feed mill processes a wide variety of raw materials to a high value compound feed for animal nutrition. The course in Feed Milling Technology gives an insight into the nutrition of productive livestock and covers the technology in grinding, mixing and pelleting.

The course will be held at the African Milling School, where we have appropriate infrastructure with classrooms, maintenance workshop and a fully equipped school mill.

We teach useful theoretical and practical skills which will empower your staff to take the best care of your equipment for reliability, efficiency and durability of your plant.

Benefits:

- Understanding feed milling technology
- Preventive maintenance and care for the mechanical installations
- Reliable equipment/reduced downtime

Course features:

- Professional training by Buhler experts
- Course materials
- Certificate of attendance

Target group

This course is suitable for staff in the grain processing industry;

- Managers/supervisors of feed mills
- Process engineers in feed operations
- Technical staff

Pricing

The course costs USD 850 + 16% VAT per person. This cost excludes boarding, travel and other related expenses.

The price includes 5 days training at the African Milling School, training materials and lunch, two tea breaks. Once confirmed we will assist with visa application and sourcing for suitable accommodation and transport.
